System-activity approach in physical education as part of the implementation of the updated GEF

V.V. Volkova 1)

1) teacher of physical education MBOU secondary school No. 50, Krasnodar, Russia; school50@kubannet.ru

Abstract: The system-activity approach is an important part of modern education today. Physical education teachers have their own peculiarities of teaching, and they have yet to adapt to new teaching methods. Nevertheless, it is important to realize that the introduction of a system-activity approach will open up huge opportunities for development for children. In this regard, the practice of applying a system-active approach in physical education lessons with primary and secondary school students is being considered.

Key words: system-activity approach, training, physical education, teacher, Federal state standard.
