Abstract: In the practice of organizing homework in biology in a modern school, you can face a number of problems that it is important for the teacher to take into account when developing homework. It is necessary to be able to identify the difficulties faced by students in their implementation. The various types of biology homework most commonly used in the learning process are also considered. Various approaches are offered to create tasks of different types for homework of students in grades 5-11 in biology.

Key words: homework, biology, homework, working with a textbook, lesson, Federal State Educational Standard.
