PSYCHOLOGY OF COLOR IN THE EDUCATIONAL ENVIRONMENT

E. A. Renner

student of the State Budgetary Professional Educational Institution of the Krasnodar Territory "Armavir Law College", Armavir, Russia; renner85t@mail.ru

Annotation. Since ancient times, people have known about the beneficial and destructive effects of color on our condition. Color surrounds us everywhere, it is our constant companion and inevitably affects emotions. That is why we are interested in finding out how different colors can affect our mood and which of them can help in the learning process.

Keywords: color therapy, chromotype, learning process, emotions, temperament, impression, business style, image, lawyer.
